Experience

Frontend-Backend Intern

June 2026 - Present

International Institute of SDGs & Public Policy Research (IISPPR)

Remote

- Collaborate with team to design and implement web app features
- Write clean, efficient code for performance and scalability
- Conduct testing and debugging to ensure code quality
- Work with UX/UI designers for seamless user experience

Web Development Intern

2 May 2026 - 16 May 2026

InAmigos Foundation

Gurugram, India

- Built responsive websites using HTML, CSS, JavaScript, Bootstrap
- Worked on UI designs using Figma

Summary

Aspiring Web Developer with a strong focus on frontend development and interest in building responsive web applications. Skilled in React and Next.js with basic backend knowledge using Node.js and Flask, along with REST API integration. Gained hands-on experience through internship and multiple full-stack projects. Focused on creating clean, user-friendly, and efficient web applications.

Skills

Languages: Python, JavaScript, TypeScript, C++, PHP, SQL, HTML5, CSS3, x86 Assembly

Frameworks & Libraries: React.js, Next.js, Node.js/Express, Flask, PHP, CSS

Databases: MySQL, MongoDB

Data Science & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Google Analytics

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Figma, Vercel

Projects

Question Paper Generator — Python, Flask, SQL, Firebase

March 2026

- Built a full-stack system to generate structured question papers from categorized question banks based on topics and syllabus coverage
- Implemented intelligent filtering logic ensuring balanced difficulty distribution and preventing duplicate questions
- Designed and managed relational database for efficient storage, retrieval, and updates of question data
- Developed admin dashboard for managing question banks and configuring paper generation parameters

AI Spend Audit Platform — Next.js, React, TypeScript, Supabase, OpenAI API, Gemini API

May 2026

- Built an AI-powered SaaS platform to analyze software and AI expenses and generate cost optimization recommendations
- Integrated OpenAI GPT and Google Gemini APIs for intelligent financial analysis and automated insights
- Developed interactive dashboards with real-time analytics and data visualization for expense tracking
- Implemented scalable frontend using Next.js 14 with server-side rendering and optimized API routes

Restaurant Booking & Analytics System — Node.js, React.js, Socket.io, MongoDB

April 2026

- Developed a full-stack restaurant reservation system with real-time table booking and availability tracking
- Built analytics dashboard for tracking reservations, revenue trends, and occupancy insights
- Designed secure authentication system using JWT with role-based access control

Price Comparison Web Application — Node.js, React.js, Puppeteer, Redis

April 2026

- Built a web scraping-based system to compare product prices across multiple e-commerce platforms in real time
- Implemented Redis caching to improve performance and reduce redundant API calls
- Designed scalable backend using Node.js for data aggregation and processing

Certifications & Publications

- Google Data Analytics – Coursera (2026): SQL, dashboards, and data analysis
- AI Tools & ChatGPT Specialization – CertX (2026): Prompt engineering and AI workflows
- Research Paper (2025): Brain Computer Interface using EEG & MEG signals
- LinkedIn Project Management Certificate (2025): Agile and project lifecycle basics

Education

B.Tech in Computer Science Engineering CGPA: 8.9/10.0

2023 – 2027

G.D. Goenka University, Sohna, Gurugram
